## TE8000

A stylish Casio network able EPOS system which can handle up to 65,000 products for bar code scanning

### TE8000 powerful scanning system for fast customer throughput

Large, tilting, operator display with 5 colour backlight

Terminals can be networked for consolidated sales data

Compact flash interface for data back-up

### System Features

The TE8000 can handle up to 65,000 bar coded products for fast, efficient throughput. Multiple terminals can be networked in order to consolidate sales data. The TE8000 features a 5.2" LCD operator display which ensures that the operator has a clear view of all transaction information. There is a 5 colour backlight enabling the operator to select an illumination colour to suit store ambience. The operator display also has a tilt screen function that allows the operator to adjust it to the optimal angle for comfort. The terminal has both a thermal receipt and journal printer for fast, silent printing and the receipt printer has an auto cutter. There is drop-in till roll loading for easy handling and the receipt header can be personalised.

### R eports
